TONY
MONTEZUMA'S
GOLD
The player takes on the role of Tony and sets out in search of the legendary Montezuma's gold. The gameplay is a classic 2D platformer focused on exploring various locations — temples, jungles, and catacombs — while collecting treasures such as gems and masks, as well as keys that unlock access to new rooms. A key element of the game is skillfully avoiding numerous traps, including spikes, pitfalls, falling blocks, and water, as well as evading enemies. The game stands out for its polished pixel art graphics, often presented in a monochromatic style.
