

Welcome to the Moon's surface - Sector 9, the most dangerous place in the galaxy! As a Luna City patrol officer, you jump into your armored lunar buggy and embark on a one-man mission to defend the base against waves of alien invaders. Race across craters, rocks and hills in a fast-scrolling landscape featuring the legendary parallax effect that defined the golden age of arcade gaming. Blast enemy UFOs and tanks, leap over obstacles, dodge bombs and mines, and finish each stage before time runs out to earn bonuses and advance through checkpoints A-Z.

Moon Patrol Redux is a faithful tribute to the 1982 Irem/Williams classic - now enhanced with improved graphics, fluid animation, arcade-accurate colors and perfect adaptation for the Atari XL/XE. A must-play for every retro fan who loves cosmic battles and pure 8-bit adrenaline!
