

ROBBO

L.K. AVALON

Lost among the stars. Alone. But not without a plan.

After the cargo ship GALAXIA-7 crashes in a distant galaxy, only one maintenance robot survives — Robbo. Stranded across a chain of mysterious alien worlds, Robbo must collect scattered bolts from the wrecked systems and activate teleporters that lead to the next planet. Each level is a unique challenge filled with mines, lasers, monsters, and tricky block puzzles.

This isn't just a rescue mission. It's a test of logic, precision, and survival in a cosmic maze of dangers. Can you guide Robbo through 55 mind-bending planets and bring him home? Think before you move. One wrong step and it's scrap metal.
