

According to legend, a prodigal dragon father, as happens in life, lost his way in the search for meaning (or got lost in a tavern over a beer), prompting his loving offspring to set out in search of him. On their journey, they encountered the colorful world of bubbles, popping them would allow... but the legend remains silent on that. The journey would last many years, through all four seasons... you'll discover it yourselves. Bubble Shooter for Atari XL/XE is a game that draws inspiration from the popular Puzzle Bobble and its mobile clone, combining these influences into a classic gameplay experience, adapted for the Atari 8-bit platform. Created by a development team consisting of Pajero, Rocky, and Miker, the game was released in July 2022. The objective of the game is to clear the screen by forming groups of three or more balls of the same color. The game ends when the balls reach the bottom line of the screen, and the player aims to remove all the balls from the playing field to win. Points are earned by destroying multiple balls with a single shot, emphasizing both strategy and quick reflexes.
